Summary

Computer Science undergraduate (Cyber Security) building full-stack web and mobile applications with React, Next.js, Node.js, and PostgreSQL, plus Python REST APIs with FastAPI. Experienced in AI/ML and GenAI integration (OpenAI), secure authentication (JWT, OAuth 2.0), Docker, and web security (OWASP Top 10). Adaptable team player with excellent verbal and written communication skills.

Education

SRM Institute of Science and Technology 2024 – 2028
B.Tech in Computer Science and Engineering – Cyber Security *CGPA: 8.45/10*

PM SHRI Kendriya Vidyalaya 2023 – 2024
Senior Secondary (CBSE), PCM *83.4%*

PM SHRI Kendriya Vidyalaya 2021 – 2022
Secondary (CBSE) *80.4%*

Experience

Python Full Stack Developer Intern May 2026 – Jul 2026
EduSkills Academy (AICTE Virtual Internship) *Remote, India*

- Engineered a full-stack e-commerce backend using FastAPI and SQLAlchemy, reducing API response latency by 20% through optimized database query patterns.
- Designed REST APIs with Pydantic validation to maintain request and response data integrity.
- Integrated a relational database and implemented user login flows and authentication.

Full Stack Web Developer Intern (MERN) Mar 2026 – May 2026
Skillumni *Remote, India*

- Developed a scalable MERN-stack task management dashboard, implementing CRUD operations and state management to handle concurrent user sessions.
- Collaborated with a team of 3 developers to integrate third-party payment gateways, ensuring 99% transaction success rates in staging environments.

Cybersecurity & Ethical Hacking Intern Feb 2026 (1 Month)
Tamizhan Skills (RISE Program) *Remote, India*

- Identified and documented 3+ critical security misconfigurations, providing remediation steps that mitigated potential unauthorized access risks.
- Analyzed network traffic with Wireshark to identify anomalous patterns and potential threats.
- Assessed authentication and access-control weaknesses in controlled lab environments using ethical hacking methodologies.

Projects

Dispatchly | *AI-Powered Email Outreach Platform (React, Node.js, Express, PostgreSQL, Resend API, OpenAI API)*

- Built a full-stack email outreach platform with a React dashboard and a Node.js REST API that delivers real emails through the Resend API.
- Integrated GenAI and AI/ML capabilities to draft personalized outreach emails from lead details.
- Implemented secure campaign management using JWT authentication and role-based access control to ensure data privacy.

Taskora | *Cross-Platform Project Management System (Next.js, React Native, Express, TypeScript, PostgreSQL, Prisma, Docker)*

- Built a Next.js web client and an Android app using React Native/Expo on a shared Express and TypeScript REST API with PostgreSQL, enabling cross-platform task synchronization.
- Secured APIs with JWT authentication, bcrypt password hashing, Zod validation, login rate limiting, and token revocation on logout.
- Containerized the backend with Docker and verified it using a 17-assertion API test suite and a web-to-mobile synchronization test. Published a downloadable Android APK.

Achievements & Extracurriculars

- **Techformers 1.0 Codeathon:** Participated in the preliminary stage organized by HackerRank Campus Crew, SRMIST, demonstrating intellectual curiosity and problem-solving skills (Apr 2026).
- **Collegiate Basketball:** Competed in ELEKTRA 2025 and ACE 2024 tournaments at SRMIST, demonstrating strong teamwork, collaboration, and discipline.

Technical Skills

- **Languages:** C, C++, Java, JavaScript, TypeScript, Python, SQL
- **Frontend and Mobile:** React.js, Next.js, Tailwind CSS, React Native (Expo), HTML5, CSS3
- **Backend, AI/ML and APIs:** Node.js, Express.js, FastAPI, Flask, REST APIs, GenAI (OpenAI API), Prisma, Zod, BullMQ, JWT, OAuth 2.0
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Firebase
- **Tools and Cloud:** Git, GitHub, Docker, Docker Compose, AWS, Linux, VS Code
- **Core CS:** Data Structures & Algorithms, Object-Oriented Design, DBMS, Operating Systems, Computer Networks
